Full-Stack Web Developer

The Role

As a developer, you are an integral part of our Production Team – responsible for the planning, building, testing, launch and maintenance of our clients' Web Applications. Working closely with our Client Services Manager you will be supporting the delivery of our Development work on-time, on budget and to standard.

Whilst you may specialise in key areas of Website Development, our team are expected to be multi-disciplined across both 'Front-end' and 'Back-end' Development. You will be highly experienced and proficient with the Open Source platform WordPress and also have experience working within the E-commerce sector and the associated challenges.

Responsibilities

- Develop technically sound, secure Website Applications within the accepted languages, processes and principles of the agency.
- To constantly review and check your work as you go, to avoid unexpected delays and excessive Snagging phases at the end of Project Sprints.
- Where necessary, liaise with clients to understand objectives, expectations and provide status updates.
- Promptly raise any concerns against delivery deadlines, budget allocation or technical requirements with the Client Services Manager.
- Support fellow developers in their endeavours to strengthen the collective efforts and knowledge of the Development Team.
- Challenge and contribute towards the continual evolution of both our Production Process and Development Standards.
- To regularly and instinctively back-up your work as you go, to ensure that never more than a working day's efforts can be lost or compromised at any time.
- To escalate any concerns or issues surrounding the integrity of your work or the work of your colleagues.
- To continually advance your own knowledge through frequent research and considered progressive development within projects. To follow industry thought-leaders and online publications as necessary to observe trends, best practice and advance your skills.
- Support the scoping and planning of a diverse range of technical challenges.

Suffolk Office, Unit 16, Brightwell Barns, Ipswich Road, Brightwell, Suffolk IP10 0BJ | suffolk@strategiq.co | 01473 375036
